

# Winter Gnomes from Nordic sagas.

**The figures are 75 cm-80 cm tall.**

**Throughout, the  
gnomes are  
equipped with 2  
electric  
movements.**

**A transformer or a power supply unit is supplied with each figure.**

**The snowboarder swivels the board 45 degrees between left and right.**

**A transformer or a power supply unit is  
supplied with each figure.**

**Input voltage 230Volt. Operating voltage 24  
Volt.**

The pictures show a decoration that our customer **JADA GROUP** from Denmark made with our figures in a centre in Slagelsee.

**Please also note the passage for the audience. Likewise, the ramp for skiers is worth a look.**

**The decoration became even more interesting with lots of light  
Light attracts people and movement achieves this effect especially.**

**6 Figures fit into a pallet box 80 x 120 x 120 cm**

**Depending on the equipment, a box with figures and packing material can weigh between 49 and 60 kg.**

**If you want to create an individual presentation for your customer, we can support you with cropped images of the figures in front of a transparent background.**

**Please send us an enquiry for this request, stating your complete contact details.**

**We will be happy to provide you with detailed information or an individual offer.  
Please contact us if you would like a quote.**
